COMP 5000/6000/6006 – Spring 2017

JSP Assignment #1

Online Examination System

In this assignment, you will design an online examination system that allows users to take the test and display the score once you submit answers. You are asked to fetch the questions and answers from the text file (assignment.txt). The online examination system should meet the following requirements.

- Questions and correct answers are given in text file.
- Fetch the questions from "assignment.txt" file. There are total of 10 questions.
- Create a web page that displays all questions, each with two options.
- Users can take the test multiple times.
- Display the score (out of 10) after each attempt.
- You don't need to keep track of user's score.

assignment.txt file format:

question1#true

question2#false

question-----correct answer

- Each line consists of one question and correct answer.
- Question and answer are separated by "#".

Please check screen capture of the application for your reference.
